

# Dyke Lane Access Improvements

A short section of surfaced path will be installed from Dyke Lane into the woodland which will link to the bridleway. This will provide a safer alternative route to Drovers Lane rather than travelling along the main road.

For contractors to undertake these works quickly and safely there

will be traffic signals in operation on the main road (B651) from **Monday 11th March** for approximately **3 weeks**, weather dependant. Please allow extra time for your journey, delays should hopefully be kept to a minimum.

Please follow any on site instructions. Sorry for any disruption and thank you for your co-operation.

To find out more about this and other projects coming up contact:

St Albans City & District Council on 01727 819366 or visit <https://www.stalbans.gov.uk/nomanslandcommon>
